Correction

After the publication of this work (Chounta et al. 2017) an error was noticed in the title of the article. The title in the original article reads: “From Making to Learning”: introducing Dev Camps as an educational paradigm for Re-inventing Problem-based Learning. However the correct article title should read: “From Making to Learning”: introducing Dev camps as an educational paradigm for Re-inventing Project-based Learning. This has been corrected here.
